Intensive Care Coordination (ICC) is a medically necessary service and is similar to activities provided such as Targeted Case Management (TCM) but requires greater frequency and more participation. ICC services must be delivered using a Child and Family Team (CFT) to develop and guide the planning and service delivery process. Though there may be several participants participating in CFTs, there must be an identified mental health ICC Coordinator to ensure participation by the child/youth, family or caregiver, and significant others so the assessment, including ongoing re-assessment and treatment planning, addresses the child's/youth's needs and strengths in the context of the values.

REFERRAL PACKET MUST INCLUDE:
